DETAILED ACTION

Election/Restrictions

1. Claims 1-4, 6, 7, and 9-45 are allowable. Claims 3, 9-17, 25-28, 30, 31, 34, 36, and 43-45, previously withdrawn from consideration as a result of a restriction requirement, require all the limitations of an allowable claim. Pursuant to the procedures set forth in MPEP § 821.04(a), **the restriction requirement among inventions of Species I-IV, as set forth in the Office action mailed on 9/12/05, is hereby withdrawn** and claims 3, 9-17, 25-28, 30, 31, 34, 36, and 43-45 are hereby rejoined and fully examined for patentability under 37 CFR 1.104. In view of the withdrawal of the restriction requirement, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with James McKenzie on 12/18/07.

The application has been amended as follows:

IN THE CLAIMS:

Claim 1:

In line 15 --the one of-- as been added after "axially beyond".

Claim 9:

In line 1 "claim 8" has been changed to --claim 1--.

Claim 32:

In line 8 --the one of-- as been added after "axially beyond".

3. The following is an examiner's statement of reasons for allowance: The prior art of record fails to disclose a mechanical seal comprising a gland; at least one pair of seal members including a rotary seal ring and a stationary seal ring; and a shuttle member wherein the shuttle member extends axially beyond one of the rotary and stationary seal rings. The closest prior art, Clark et al. (US Patent No. 5,913,520 ~~6,202,907~~), discloses the invention substantially as claimed but fails to disclose the shuttle member extending axially beyond one of the rotary and stationary sealing rings and there is no motivation, absent the applicant's own disclosure, to modify the Clark et al. reference in the manner required by the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
